

Title: **The Non Applicability to Kinetrol Products of EU Regulation No.1907/2006 on the Registration, Evaluation, Authorisation of Chemicals (REACH)**

Kinetrol products do not contain materials that are required to be registered under the above Regulation (REACH SVHC candidate list current) and Kinetrol does not manufacture such substances. Materials that are used in the manufacturing processes at Kinetrol sites also do not need to be registered by Kinetrol and are used in quantities of less than 1 tonne. Kinetrol products, under normal conditions of use, do not emit materials or substances.

Kinetrol activities and products therefore lie outside of the requirements of the above Regulation.
